

2020 eWater Software Conference

Mekong Session

Role of modelling to support water management in the Mekong region

Wednesday, 2 December 2020

14:00 – 16:00 (AEST) or 10:00 – 12:00 (Mekong time)

Conference Login details: <https://live.remo.co/e/supporting-water-management-in-t>

Making the most of Remo

- **Profile** – name and picture.
- See what's coming up? Go to **Agenda**.
- **Switch** – Main Session? Mekong Session?
- Move **tables** by double clicking on an empty seat, change floors to find more people!

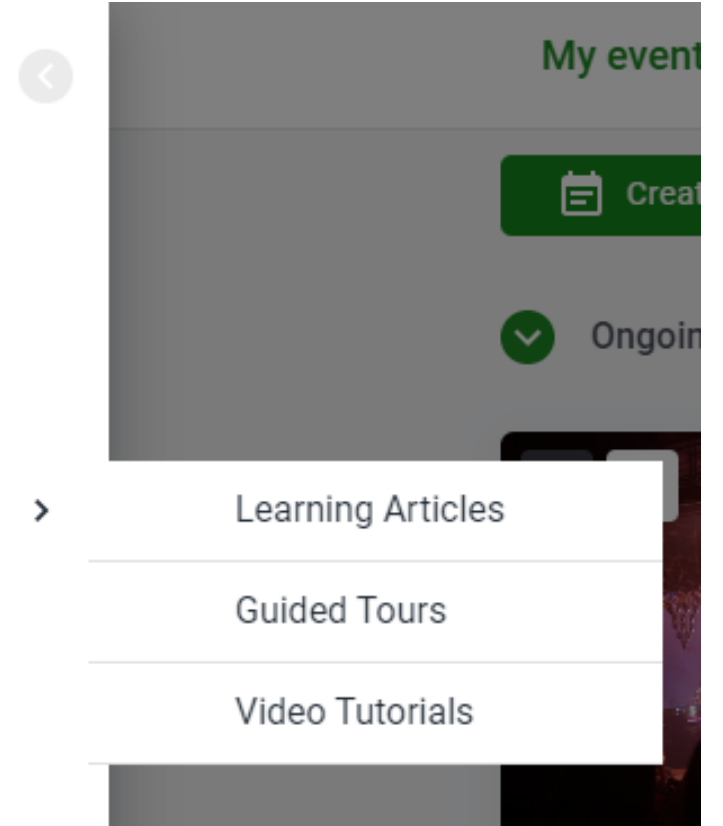

The screenshot displays the Remo virtual conference interface. At the top, a header bar shows the event title "2020 eWater Conference - Day 2" and the subtitle "Showcasing the latest user case studies and software enhancements". The interface includes a navigation menu on the left, a "Floor" selector with buttons for floors 1 through 10 (floor 1 is selected), and a "Need help?" button. The main area features a virtual room with a central stage displaying the eWater logo and a presentation slide. Below the stage, there are 28 virtual tables arranged in a grid, each with a unique icon and a small profile picture. The bottom of the screen has a control bar with icons for "Present", "Cam Off", "Mic Off", "Chat", "Share Screen", and "More". The Remo logo is visible in the top right corner, and the eWater logo is in the bottom right corner.

Making the most of Remo

- **Problems? Audio/Video** issues?
<https://help.remo.co/en/support/solutions/folders/63000197943>
- **Maximize** the presenters shared screen for a better view.
- **Ask questions** using the Q&A feature (only available while in present mode).
- **Chat** send a message to others at your table or privately to an individual.
- **Networking** – turn your camera and microphone on to interact with the people at your table (not available during presentations).

Speakers in Mekong Session

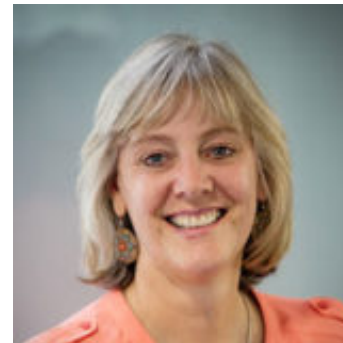

Dr Robert Carr
(eWater)

Welcome remark on Mekong Session

Dr Geoffrey Adams
(eWater)

Source, MUSICX and Urban Developer – Capability and Functionality

Juanita Moolman
(eWater)

Role of water resource modelling in catchment assessment in Cambodia

Mr. Virak Chan
(World Bank Group)

HE Mr Watt Botkosal

(Cambodia National Mekong Committee)
Development of National Decision Support System and integrated water resource planning in Cambodia

Mr Rattykone Sayasane

(Mekong River Commission Secretariat)
Modelling of impacts of climate change and development infrastructure on Mekong flow, sediment regimes and water quality

Dr Winai Wangpimool

(Mekong River Commission Secretariat)
Reinvigoration of MRC's data, information, modelling, forecasting and communication systems

2020 eWater Software Conference

Mekong Session

Role of modelling to support water management in the Mekong region

Wednesday, 2 December 2020

14:00 – 16:00 (AEST) or 10:00 – 12:00 (Mekong time)
