

# Types of Output

There are four basic types of output from music simulations:

1. [Time Series Graphs](#)
2. [Statistics \(tabular\)](#)
3. [Cumulative Frequency Graphs](#)
4. [Advanced Charting](#)
5. [Exporting music Output Data Files](#)

All output types are available at any point in the catchment, and are accessed via the context-sensitive menu obtained by right-clicking on a node or link.
